

It's important that you follow these instructions while using your Zefir Vape device to ensure safety, maintain functionality, and extend its lifespan. These guidelines are designed to help users avoid common mistakes such as damage from water exposure or improper handling, which could lead to malfunctions or safety hazards.

How do I safely use my Zefir Vape device?

Handle your device with care and avoid shaking or subjecting it to impact. Avoid damage to the device's external and internal components. If you damage your device or the device is defective, do not attempt to repair or use the device, and dispose of the device appropriately.

Do not, for any reason, disassemble or reassemble your device.

Keep your device dry at all times.

Do not immerse the device in water or any other solution, and do not wash under running water.

Do not use the device in high oxygen environments, in prohibited or restricted areas, or in areas with limited airflow and ventilation. Do not use your device whilst driving or operating heavy machinery.

Do not use your device if: it is expired; it is broken, cracked, deformed, defective, leaking or malfunctioning; water or liquids have entered or come into contact with the device; any contamination of the device is suspected; or there is a noticed change in the taste or flavour of the e-liquid.

Do not share this device with anyone else under any circumstance.

WARNING: CHOKING HAZARD - This device contains small parts.

How do I start the Zefir Vape device, install and replace Zefir Vape Pods?

Instructions to start the Zefir Vape device:

a. Before using the Zefir Vape device for the first time or after a protracted period of non-use, you must ensure that the device is fully charged.

b. You can charge the Zefir Vape device using the USB-C charging cable included in the pack.

c. Plug the small end of the USB-C cable into the Zefir Vape device and the other end into a computer or a power bank.

d. When the device is fully charged, all four (4) white LEDs will light up, indicating 100% charge. You can then use the Zefir Vape device. Each white LED represents 25% of the charge. For example, if one LED lights up, then the device is at 25% charge. If two LEDs light up, it indicates 50% charge, and so forth.

e. When the device is running low on charge, the four white LEDs will flash continuously, and the device will vibrate to alert the users of low charge. You can follow steps (b) to (d) to recharge the device. It is recommended that you avoid using the device when it is low on charge.

Instructions to install and replace Zefir Vape Pods:

a. Pop the Zefir Vape pod out of its packaging by opening the blister foil.

b. Remove the grey cap from the top of the pod, the cover from the bottom of the pod and the silicone film from the bottom of the pod.

c. Insert the Zefir Vape pod into the top part of the device.

d. A light will flash, and the device will vibrate indicating successful connection of the Zefir Vape pod and the device.

e. You can then start using the device.

f. Once the pod is empty, dispose of it properly and replace it with a new one. Do not attempt to refill the pod.

How do I store my Zefir Vape device?

KEEP OUT OF REACH OF CHILDREN. Store your device securely and separate from food, drink and other medical products.

Do not place or store your Zefir Vape device in hot, humid or wet environments or near combustible or explosive materials. Do not expose the device to heat, cold, dampness or direct sunlight.

Store your device securely and separate from food and drink and other medical products.

How do I care for my Zefir Vape device?

To maintain optimal performance, keep the mouthpiece and device clean and dry. Do not wash the device with water. Use a dry cotton swab to clean. Slightly dampen the swab with isopropyl alcohol and dry thoroughly.

How long does the Zefir Vape device last?

The length of time your Zefir Vape device will last depends on several factors, including the manner of your use. If the device is used as instructed and under standard conditions, then it will last for an average of two (2) years.

How do I dispose of my Zefir Vape device?

Please dispose of your Zefir Vape device by recycling it. Please visit, www.zefirvape.com.au for further instructions.
